## WHO WE ARE

We are a leading Brazilian company in ensuring the integrity of oil and gas operations, with 45 years of experience in developing subsea solutions for the offshore energy industry. We are committed to maintaining our customers' assets, ensuring safe operations for both our employees and the environment, and promoting long-term sustainability. Our areas of expertise include prevention, contingency, and engineering, and we offer complete and innovative solutions to meet our customers' needs.

## OUR MISSION

At our company, our primary goal is to safely and sustainably extract the valuable energy resources found in the depths of the oceans. To achieve this, we leverage cutting-edge technologies and a hybrid diving and robot system that includes 34 ROVs, 15 of which are Work Class, capable of operating at depths of up to 3,000 meters. By continuously advancing our technology and minimizing risks to our employees, we strive to exceed our customers' expectations. In line with this objective, we have recently expanded our fleet to include a total of 12 vessels that can provide a wide range of underwater engineering services.

## HSE

Ensuring the safety of our employees on board vessels and at our facilities is of paramount importance to us. We are committed to providing a safe and healthy working environment for everyone, in compliance with relevant legislation governing occupational health and safety. To achieve this, we equip our employees with both individual and collective safety gear, and proactively identify and eliminate any risks associated with work activities.

## OUR INSTALLATIONS

We are headquartered in Rio de Janeiro, with branches in Macaé (RJ) and Rio das Ostras (RJ), and we operate on projects spanning the Brazilian coastline.

## OUR SERVICES

Over the course of our 45-year history, Oceânica has successfully delivered numerous innovative and challenging projects, building our expertise, and cementing our position as a leading player in the industry. We are committed to driving innovation in maritime activities, continuously adapting and enhancing our services in close collaboration with our customers and staying at the forefront of the market.

## OUR ASSETS

Our asset portfolio is both modern and diversified, and able to fulfill a wide range of project requirements, while also meeting all customer demands. We currently operate a fleet of 12 vessels of varying sizes as well as 34 ROVs that can be deployed at depths ranging from 0 to 3000 meters. We take pride in being the only Brazilian company capable of offering such a wide range of services.

## VESSELS

Oceanica's fleet comprises SDSVs (Shallow Diving Support Vessels), RSVs (ROV Support Vessels), MPSVs (Multipurpose Support Vessels), and AHTSs (Anchor Handling Tugs), which are all manned by our own crew and service personnel. These vessels are exclusively dedicated to supporting our clients in the construction and maintenance of subsea infrastructure.

## ROV

With a total of 34 vehicles, ranging from small electrical inspection ROVs to state-of-the-art 250HP Work Class ROVs, our ROV fleet in Brazil is unmatched. This comprehensive range of ROVs enables us to provide our clients with a full spectrum of subsea services that meet their needs.
